

IMS Special lectures - Barry Simon - February 26 and 28, 2018 — poster text

The event information below is the text alternative to the original printed poster.

The UVa Department of Mathematics & The Institute of Mathematical Sciences present

Special Lectures

BARRY SIMON California Institute of Technology

February 26, 2018 3:30-5:00 pm, Minor 125 Tales of Our Forefathers

Abstract: This is not a mathematics talk but it is a talk for mathematicians. Too often, we think of historical mathematicians as only names assigned to theorems. With vignettes and anecdotes, I'll convince you they were also human beings and that, as the Chinese say, "May you live in interesting times" really is a curse.

February 28, 2018 2:30-3:30 pm, Maury 209 Tea: 3:30-4:30 Kerchof Hall 314 4:30-5:30 pm, Maury 209 More Tales of Our Forefathers Abstract: This is not a mathematics talk but it is a talk for mathematicians. Too often, we think of historical mathematicians as only names assigned to theorems. With vignettes and anecdotes, I'll convince you they were also human beings and that, as the Chinese say, 'May you live in interesting times' really is a curse. It is not assumed that listeners heard my earlier talk. Amongst the mathematicians that I'll discuss are Riemann, Newton, Krein and Noether". Credit: Bob Paz

Organizers: Ira Herbst and Andrei Rapinchuk More information: Department of Mathematics, University of Virginia PO Box 400137, Charlottesville VA 22904-4137 math.virginia.edu/ims/lectures
