

Repeating a Course

Two essentially identical courses, whether under the same course number or not, may **not** both be counted for degree credit. If a course is passed and repeated, only the first grade received is entered in the computation of grade point average. However, only the repeated course counts toward the 120 credits required for graduation. Both the original and repeated course, and their grades, appear on the student's transcript. If a course is failed and repeated, both courses and grades appear on the transcript, the repeated course with a passing grade counts toward the 120 credits, and both courses are computed in the grade point average. All Fs are calculated into your grade point average.
